

WVARA Field Day, 25-27 June 2010

WHERE: This year's Field Day operation will be at the top of Mora Hill (see map above) located in the San Antonio Open Space Reserve near the Magdalena exit off of Highway 280 in Los Altos Hills.

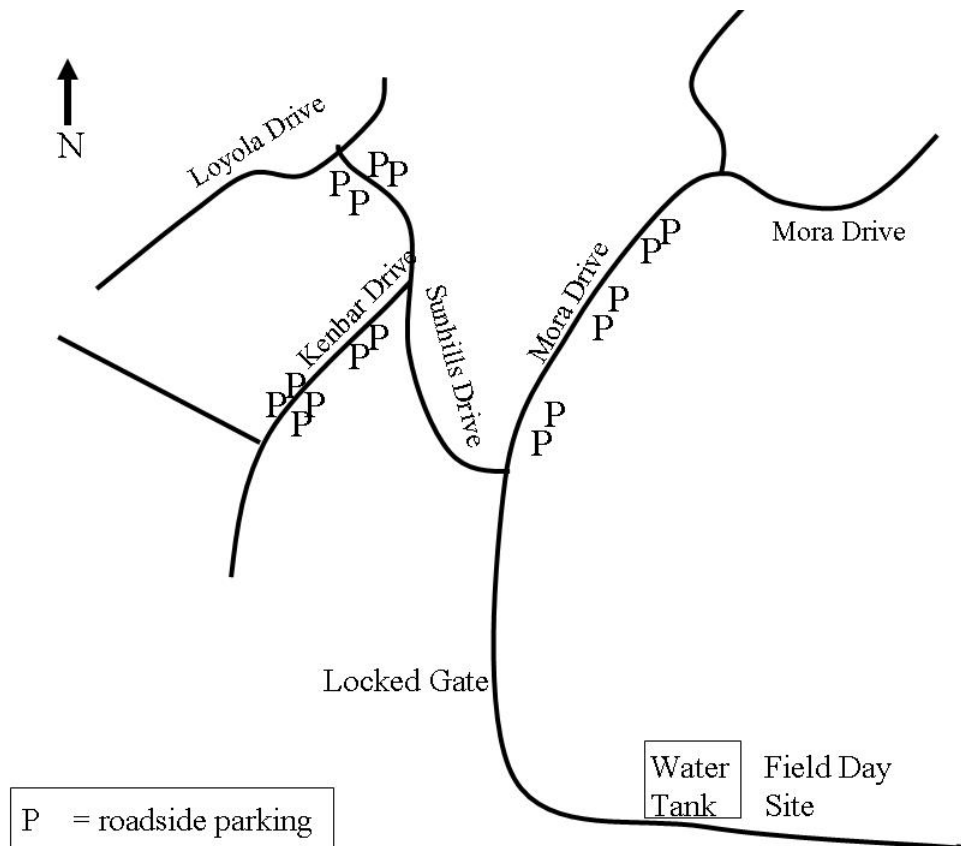

WHEN: Set up of the tents, antennas and equipment will begin at 11am on Friday June 25. Please come Friday morning/afternoon if possible – we'll need all the help we can get! Our plan is to be completely set up by evening so that we can do some recreational operating and test out the antennas Friday night. Several of us expect to spend Friday night on Mora Hill.

Final set-up activities will occur Saturday morning. **WE NEED OPERATORS!** Field Day operations officially begin Saturday at 11am and continue until 11am Sunday. Our goal is to keep all of the HF stations in operation the full 24 hours. Tear-down and packing activities will probably last from 11am until about 2pm Sunday afternoon.

Parking at the Field Day site is limited. As a result, we are limiting the vehicles parked at the site to individuals who plan to stay on the hill for 4 hours or longer. For the rest, we recommend parking down the hill on the surface street locations shown on the map.

Note: do not park within 300 feet of the gate. There are “no parking” signs in that area and they do write parking tickets.

Suggesting Parking Locations

How can I participate?

- Join us for set-up, beginning Friday at 11am

- Come operate Saturday 11am to Sunday 11am (HF/SSB, HF/CW, HF/Digital, VHF/UHF, GOTA)
- Bring kids/friends/non-hams for the GOTA station
- Help us with tear-down beginning 11am on Sunday
- Bring a camcorder and record our adventure!

What to bring:

- Hot weather gear (straw hat, sun screen, sun glasses, etc)
- Sturdy shoes
- Water, gatorade, etc. (There is no running water at this site)
- Sweater or warm coat for late night (temperatures will drop to upper 50s)
- A camera or camcorder!
